Communities That Care

From Wikipedia, the free encyclopedia

This article has multiple issues. Please help [improve it](#) or discuss these issues on the [talk page](#).

- It reads like a **personal reflection** or **essay**. Tagged since August 2009.
- **Very few or no other articles link to it.** Please help [introduce links](#) to this page from other [articles related to it](#). Tagged since June 2009.
- It may need to be **wikified** to meet Wikipedia's [quality standards](#). Tagged since June 2009.

Communities That Care (CTC) is a program of the *Center for Substance Abuse Prevention* (CSAP) in the office of the United States Government's *Substance Abuse and Mental Health Services Administration* (SAMHSA). CTC is a coalition-based prevention operating system that uses a **public health** approach to prevent youth problem behaviors such as *violence*, *delinquency*, *school drop out* and *substance abuse*.^[1] Using strategic consultation, training, and research-based tools, CTC is designed to help **community stakeholders** and decision makers understand and apply information about risk and protective factors, and programs that are proven to make a difference in promoting healthy **youth development**, in order to most effectively address the specific issues facing their community's youth.^{[2][3]}

Developed by Drs. *J. David Hawkins* and *Richard Catalano* at the University of Washington's *Social Development Research Group* (SDRG), CTC's principal strategy, the **Social Development Strategy** (right), focuses on strengthening protective factors that can buffer young people from problem behaviors and promote positive youth development.^[4]

CTC is grounded in rigorous research from **social work**, **public health**, **psychology**, **education**, **medicine**, **criminology**, and **organizational development**. It engages all community members who have a stake in healthy futures for young people and sets priorities for action based on community challenges and strengths. Clear, measurable outcomes are tracked over time to show progress and ensure accountability.^[5]
